Education:

Florida State University | Tallahassee, Florida

May 2026

- Bachelor of Arts and Sciences- Computer Science Major with a minor in Data Analytics
- Florida State University Honors Program
- Global Citizenship Certificate with Honors
- GPA: 3.915/4.0

Software Engineering Experience:

Software Development Intern – Raymond James

May 2025 – Present

- Contributed to the front-end development of the Client Onboarding (COB) application, focusing on the Financial Advisor Change feature used across various departments. Designed and implemented dynamic, user-facing components using TypeScript, JavaScript, Angular, Node.js, and Webpack to improve usability and maintainability. Collaborated with an agile team of four developers from diverse technical backgrounds, participating in code reviews, stand-ups, and cross-functional planning.

Software Engineer Intern - Aline Ops

Louisville, KY, May-August 2024

- Developed a customizable application with a suite of 6 features that clients could integrate into their personalized app development projects, enhancing flexibility and functionality. Functional in both iOS development and android development. Develop products and maintain web and mobile applications, contributing to both frontend and backend development. Collaborated closely with product designers to design, develop, and test new features, enhancing the user experience and functionality.

AMC Programming Club

Florida State University 2023-Present

- Practice weekly programming problems and discuss some common topics in interviews and the Programming Contest. Became proficient in C++ and Java.

Skills:

Languages: C/C++, C#/ .NET, Python, Java, TypeScript, JavaScript, HTML SQL, CSS, Git, SQL
